

# SELF SERIES

Payment solutions for all your self-service  
use cases

ingenico

## New challenges in the self-service market

With new economic and sanitary challenges, the payment ecosystem is moving with increasing speed in adopting self-service solutions.

Operators are adapting their payment infrastructure and investing more in self service solutions to meet their consumer expectations. Indeed, consumers desire technology that enables a quicker and more convenient shopping experience with limited interaction.

# 80%

of consumer worldwide are now using contactless, citing safety and cleanliness as key drivers. 8 in 10 of transactions are now contactless in Europe

(source: Mastercard)

# 73%

of surveyed shoppers prefer retail self-service technologies, such as self-checkout.

(source: 2020 Annual connected Retailer Survey-SOTI Survey)

# +13,3%

2019-2026 CAGR for the global kiosk market

(source: Fortune Business Insight)

## Ingenico, your trusted partner in self-service

As a pioneer and leader in self-service payments for over 30 years, Ingenico offers a complete range of self-service solutions that are targeted at specific vertical industries use cases (Vending, Retail, Transportation, Parking, Hospitality, and more). With its new Self series, Ingenico continuously re-invents the self-service business.

With its new Self series as well as its expertise in payments, fleet management and customer support, installing and operating unattended payments has never been so easy and secure.

Cumulated sales of Ingenico unattended devices  
(in units - 2000-2020)

• **+1,300,000 units**  
sold since 2010

• **+70 countries covered**

## Consumer Requirements

- **All payments accepted**

As part of the Tetra range, the Self Series leverages one of the largest payment applications portfolio and can accept QR code-based payment thanks to the embedded or optional camera.

- **Easy to use**

The Self Series offers color and touch screens, sound guidance capability, a hybrid reader for natural gesture, a presence detector for automatic keyboard lighting, resulting in a very fluid and user-friendly interface.

- **Security & Durability**

Certified with the latest security standards (PCI PTS v6), the Self series provides a high degree of security resulting in operators piece of mind.

## Operator Requirements

- **Easy Integration**

The Self **all-in-one** are very compact terminals which allows them to be easily integrated into kiosks, either from the outside or inside, preserving the kiosk's design. The Self **modular** can be installed in any kiosk as an upgrade from an ISelf configuration or a competitive legacy solution.

- **Robustness**

The Self Series is designed for intensive use cases (IK09/IK10/IK10+) and suitable for both indoor and outdoor environments (IP65/IP44).

\*If the Self Series Integration Guide best practice recommendations are implemented.

- **Modularity**

Integrators can select the right modules to build their desired configurations (MDB, 4G, BT) with future evolution to support a 5G add-on module. These add-on boxes work on any Self terminal (all in one or modular).

- **Cost-efficiency**

The Self Series design builds in high quality and reliability which maximizes the overall terminal availability. Additional services (extended warranty, remote fleet management..) contribute to reducing the TCO.

- **Long-term support**

Telium2 or Telium TETRA applications are portable to the Self Series resulting in optimizing previous development investments.

## The Self Series grows your business and insures long-term revenues with a full set of applications, development tools, and services

### PAYMENT APPLICATIONS

Leverage Ingenico's existing development tools to reduce overall time to market and integration effort

- **+2,500 payment applications:**  
Visa, Mastercard, Amex, CUP, UPI, Discover, Alipay, Wechat
- **A full package of development and project tools:**  
SDK + Unattended add-on • Ingedev, LLT, Profiling tool, remote debug, trace...  
PCL APIs for easy integration • Training sessions with experts (remote, on site..)

### ESTATE MANAGEMENT & SECURITY

Maximize terminal availability and uptime while maintaining full security and control

- OS & applications download campaign management • remote helpdesk & diagnostics • remote keys injection...

### HARDWARE SERVICES PACKAGE

Relief from worrying about payment security complexity

- From consulting service to daily support and maintenance with our Ingenico local experts

**2-5** years  
warranty extension

**33** repair centres  
spread worldwide

More than **300**  
supports partners

**25**  
customization centres

# Advanced features for an improved self-service experience

Ruggedized capacitive touch screen (IK09)  
**PIN on Glass certified for SCA (Strong Customer Authentication) on each SELF terminal**

16 keys mechanical backlit keyboard  
**Suitable for visually impaired people**

**Hybrid card reader** (natural introduction gesture) with backlit leds in the reader entrance and steel made shutter

Fully compliant with **EVA EPS (SDM)**

**Embedded 2MP camera** for alternative payment method (APM), Barcode & QR management, wallet, loyalty...

**2 slots or optional add-on boxes** according the needs and use-case requirements (4G, Bluetooth, MDB...)

**Standard connectors..**  
(USB, RS232, LAN)
