

AXIUM Retail Core

Providing merchants and integrators a reliable and focused payments integration.

- AXIUM Retail Core (ARC) provides integrators and merchants support for legacy applications UPP (TETRA) and RBA (Telium2) APIs.
- Both integrated and semi-integrated solutions are available to provide businesses with a payment system that uniquely suits their needs, meets stringent security requirements and offers an improved consumer experience.
- ARC is available in North America and Europe.
- The Axiom platform includes a full range of payment devices and APIs for easy integration of value-adding applications.
- Built to support payment features for industry verticals including Retail, Restaurant, Lodging and Healthcare.

Powered by Android, AXIUM Retail Core is the payment solution that provides the best-in-class buying experience, while optimizing performance and security.

AXIUM Retail Core (ARC)

ARC functionality enables the capability for customers to add new features.

- Put your payment or value-add app on any AXIUM device
- Enhanced screen designer with native Android layouts designed using Android Studio
- Create your own UI engine
- Decrease integration time with Ingenico's simple optimized quick chip integration
- Integrate on device, from a browser or from the cloud using Ingenico's web based APIs

Payment applications

Our dedicated teams will support you as you develop new payment applications. Thanks to the modularity of Android, our global Android Competency Center, and expertise gained from developing thousands of payment applications over 4 decades, we can help you to achieve your technology ambitions quickly and safely.

- AXIUM offers you a comprehensive portfolio of payment and device-management applications.
- Thanks to the modularity of Android, our dedicated teams are on call to support you, as you develop the payment applications that match your business.

Business Enablement

With AXIUM, implementing business applications has never been easier.

- Dedicated APIs enable single integration with the payment world for all devices.
- Payment providers can create their own app stores and distribute them in just a few clicks, so you can select the ones you want on your terminals.
