# eSign Solution

Your new way to sign with ease!
Secure. Seamless. Efficient.

ingenico
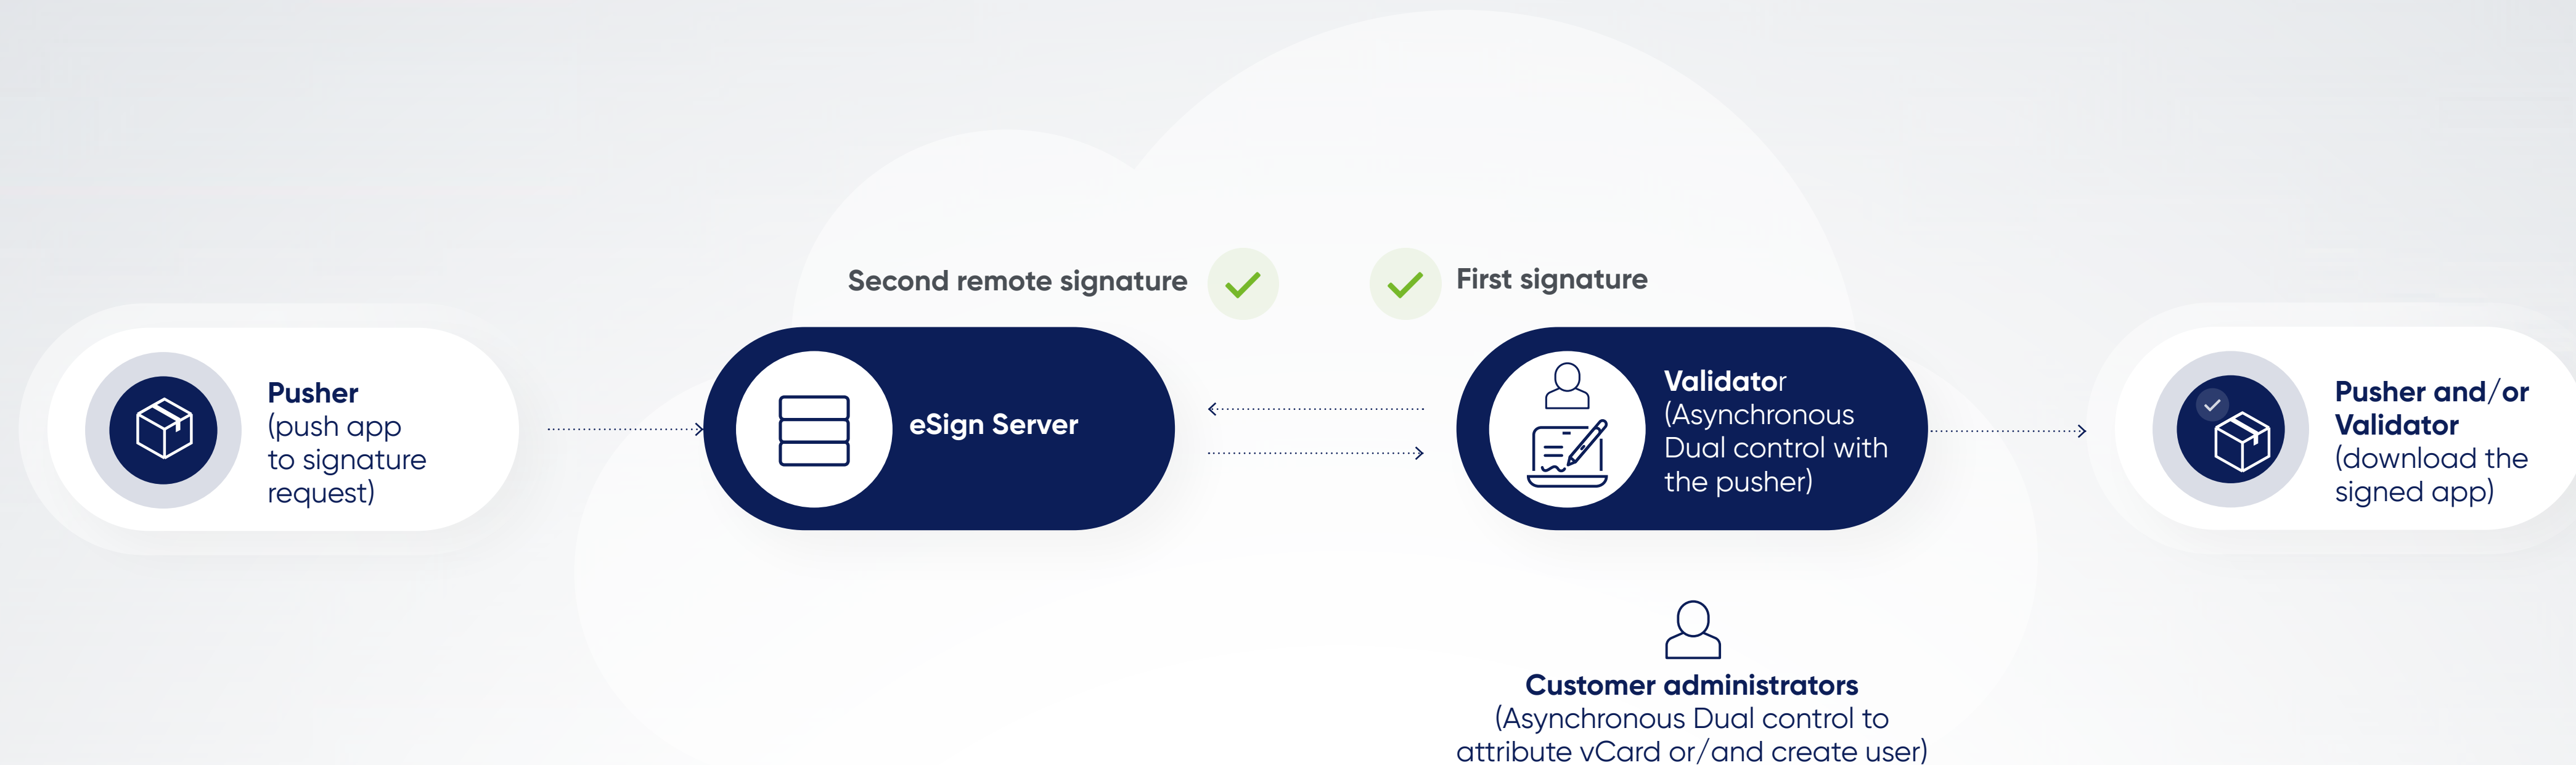

Discover the eSign Solution

Secure and efficient application signing for payment terminals

As a software-based solution, eSign is designed to remotely sign both payment and non-payment applications, offering top-tier security, flexibility, and cost-efficiency. It offers a comprehensive approach to managing digital security and user access across your entire payment ecosystem. With advanced technology and intuitive features, eSign ensures full compliance with regulatory standards while optimizing your operations for maximum efficiency.

Adaptable and affordable:
Meeting market and standard demands

The eSign solution, a simplified solution for developpers and ISVs to sign remotely both payment and non-payment applications

Second remote signature ✓   ✓ **First signature**

Pusher
(push app
to signature
request)

eSign Server

Validator
(Asynchronous
Dual control with
the pusher)

**Pusher and/or
Validator**
(download the
signed app)

Customer administrators
(Asynchronous Dual control to
attribute vCard or/and create user)

Asynchronous mode enables pusher and validator to work across countries and time zones.

Secured solution

Keep top-tier security with our remote signature solution

Security is at the core of our Signature Solution. eSign solution delivers robust protection while simplifying management tasks.

Experience peace of mind with our Signature Solution, designed to meet PCI PTS and PCI P2PE standards, significantly reducing regulatory risks and liabilities. Effortlessly manage user rights with remote renewal capabilities, saving valuable time and resources. Enjoy adaptive security with scalable protection that caters to various needs, including Payments, Loyalty Programs, and P2PE. Gain complete oversight with enhanced visibility and control through comprehensive usage monitoring.

Powerful and flexible solution

Experience unmatched flexibility and convenience

Our signature solution streamlines signature, user, and account management, boosting efficiency and letting you focus on running your business.

Discover how our eSign Solution transforms signature management with unparalleled ease and efficiency. Our solution eliminates the need for Sign KIT Tools, making the signature process straightforward and hassle-free. By removing physical user cards, we enhance user convenience and experience. Seamlessly add or replace users without delays, and leverage Asynchronous Dual Control to allow Validators to handle Developer Signature requests within 30 days, boosting flexibility and efficiency. Customer Administrators can remotely manage users and VCard allocations, while Ingenico Regional Administrators enjoy streamlined oversight of customer accounts.

In hosted mode, eSign Solution ensures improved service delivery and maximizes performance, delivering a comprehensive and efficient solution.

Reduce costs while maximizing efficiency

Adopting our solution will streamline management, cut expenses, and lower your Total Cost of Ownership (TCO).

Our solution eliminates hardware and card expenses, cutting costs and simplifying management by removing the need for card handling and secure storage. Enjoy accelerated deployment with a one-week turnaround for Customer Accounts and VCards, compared to the previous six weeks. The universal interface provides a unified front-end for all terminal types, enhancing convenience. With intuitive menus, daily operations are user-friendly and minimize training costs. Our fully digital, hosted solution reduces the Total Cost of Ownership (TCO), while scalable licensing allows for flexible upgrades to match evolving business needs.

Tailored solution for greater efficient and flexibility

		Service provided
