

Built to last, ready for what's next

Ingenico's Android range, designed
for every payment experience.

ingenico

Businesses need payment platforms that evolve alongside customer expectations.

The future of payments starts **with flexibility.**

Payment are becoming increasingly invisible as they are embedded and integrated. Consumers no longer compare payment methods; they compare the simplicity, convenience and trust of the experiences surrounding them.

As commerce evolves, businesses need solutions that can adapt to changing customer habits and support every payment journey with minimal friction.

Beyond payment acceptance, value increasingly lies in the services surrounding the transaction, from loyalty and digital engagement to identity and data-driven experiences.

Android is enabling payment devices to evolve into intelligent, connected platforms for commerce.

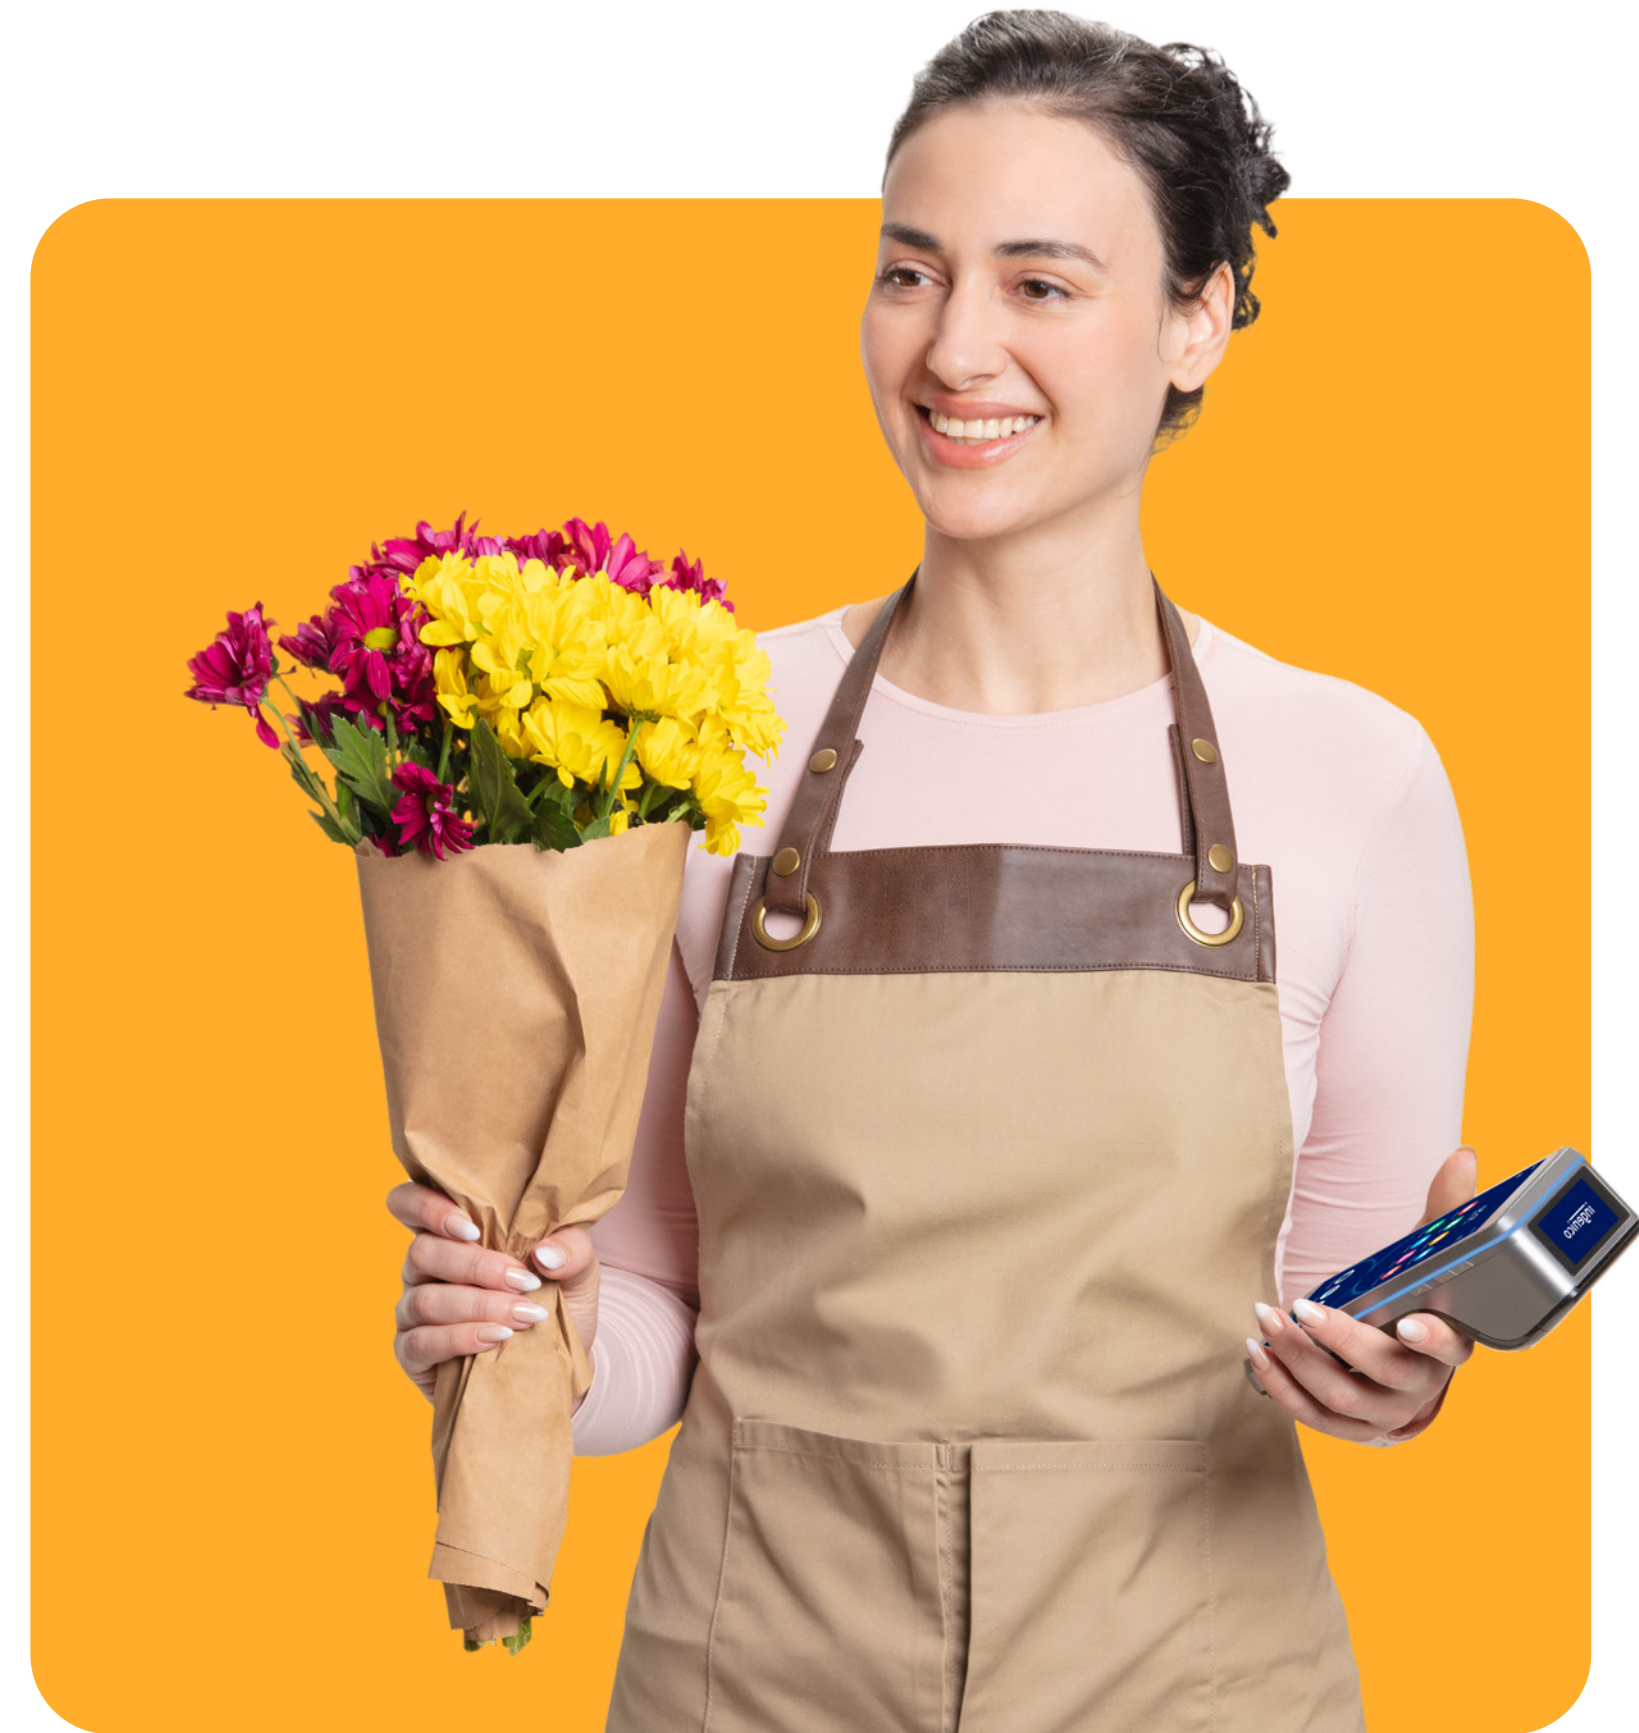

One range. Every payment experience.

AXIUM is Ingenico's Android range of payment solutions, designed to support every payment environment and every stage of the commerce journey.

From traditional payment acceptance to SoftPOS, self-service and integrated retail experiences, AXIUM enables businesses to extend acceptance, wherever customers choose to engage.

As the industry shifts from payment devices to software-defined commerce platforms, AXIUM goes beyond hardware to combine payments, applications and services within a single ecosystem.

Whether enabling new payment methods, expanding acceptance points or supporting value-added services, AXIUM helps businesses simplify complexity and adapt to the rapidly evolving world of commerce.

AXIUM is not just designed to accept payments.
It is designed to power the future of commerce.

The voice of our customers

Ingenico's AXIUM platform is a key differentiator.

It provides us with a reliable foundation on which we can build our payment applications. Furthermore, as there is a fair amount of investment needed in logistics to scale the business, Ingenico's Managed Services has benefited both our customers and us.

Leading Australian payments company

Proven today. Built on expertise. Trusted worldwide.

AXIUM is built on a proven foundation trusted by businesses around the world. With millions of Android payment devices deployed and years of payment expertise behind every solution, AXIUM combines reliability, security and innovation to support businesses today while preparing for the opportunities of tomorrow.

As customer expectations evolve and new commerce experiences emerge, AXIUM continues to evolve with a portfolio designed to deliver long-term value and innovation.

Reliability at scale

Built for the
experiences customers
expect today - and
the opportunities of
tomorrow.

Designed to power the next generation of commerce experiences.

The new generation of AXIUM is designed to deliver faster, more intuitive and more engaging interactions across every commerce environment. Large displays, customer-facing screens, LED guidance and haptic feedback help create smoother and more intuitive experiences for both merchants and consumers, reducing friction at every step of the payment journey.

Whether at checkout, in self-service environments or on the move, AXIUM combines thoughtful design with advanced capabilities to support seamless interactions and evolving customer expectations.

From digital engagement and customer services to new payment methods and emerging commerce experiences, AXIUM helps businesses create meaningful interactions beyond payment acceptance.

Future-Ready Innovation.

AXIUM technology is designed to help businesses adapt, innovate and grow in a rapidly evolving commerce landscape.

Combining enhanced performance, Android 14, PCI PTS v7 security and remote Android upgradability, AXIUM provides a future-ready foundation that simplifies deployments, strengthens security and supports long-term device lifecycles.

Faster processing and increased memory capacity enable smoother payment experiences and business applications, while eSIM technology simplifies network connectivity across device estates.

Remote Android upgrades help businesses benefit from future enhancements while reducing operational effort and extending device longevity.

Together, these capabilities provide the flexibility to embrace new opportunities while protecting investments and maintaining operational continuity.

AI Ready for what's next.

AXIUM combines powerful hardware, intelligent sensors and AI-ready capabilities to support smarter, more secure and more engaging commerce experiences.

Predictive Monitoring

Detect potential device issues before they impact operations.

Accessibility Assistance

Support inclusive payment experiences through audio and adaptive interfaces.

Privacy Protection

Help safeguard sensitive information with intelligent screen protection.

Identity Verification

Enable customer and age verification with integrated camera capabilities.

Personalized Experiences

Enable loyalty services and more personalized customer interactions.

Smart Recommendations

Deliver context-specific suggestions and value-added services.

Your brand, built into **every** **interaction.**

AXIUM provides extensive customization capabilities, from device aesthetics and branding to customer-facing experiences and business-specific workflows. Businesses can personalize colors, logos, user interfaces, welcome screens, and customer-facing interactions to create a seamless extension of their brand.

Beyond branding, AXIUM can be tailored to support specific workflows, services, and customer journeys, helping businesses create differentiated experiences while maintaining a consistent payment and brand experience across every customer touchpoint.

Whether supporting retail, hospitality, banking, transportation, or specialized environments, AXIUM enables organizations to create devices that feel uniquely their own.

Continuous innovation. Consistent experience.

AXIUM is built on a common technological foundation that ensures continuity across current and next-generation devices. By leveraging the same development environment, APIs, payment kernels and familiar tools, businesses and developers can adopt new devices faster while reducing migration effort and preserving existing investments.

As the AXIUM range evolves, applications, integrations and business processes can continue to build on proven foundations, enabling organizations to benefit from existing developments without starting over.

Move forward

Powered by Ingenico 360

Ingenico 360 provides a common services ecosystem across current and next generation AXIUM devices. From development and application deployment to device management, security, merchant services and analytics, businesses can continue to leverage the same tools and services throughout the device lifecycle.

This continuity helps streamline operations, simplify transitions and accelerate innovation, enabling organizations to adopt new capabilities with confidence while maintaining operational continuity across the device lifecycle.

One ecosystem.
Every stage of the journey.

The voice of our customers

With AXIUM, we aim to empower our partners and merchants with a reliable, secure, and forward-leaning terminal line that integrates with our omnichannel offerings, providing them with the tools they need to succeed.

Payroc wanted to bring a top-of-the-line terminal that could go toe-to-toe with anybody else and we really think that's what we have with Ingenico AXIUM and the Payroc App.

Payment processor in Canada.

Ingenico is the global leader in **payment acceptance and services.**

We enable our customers, and their customers to do more with payments. Active in 32 countries, with over 3,000 employees we have been at the forefront of the commerce landscape for over four decades.

Tens of millions of Ingenico devices are deployed in over 120 countries and powered by more than 2,500 applications, supporting millions of consumers every day.

Through our advanced integrated solutions and network of partnerships, we simplify the world of payments and bring value added services to move commerce forward.

Moving Commerce Forward
